BAFREC

Gruppo post trattamento estivo con batteria promiscua caldo/freddo.
Summer cooling group with double use heating/codling.

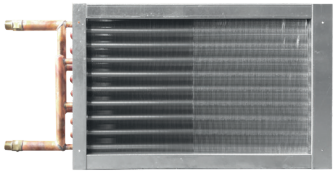

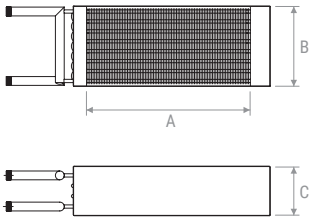

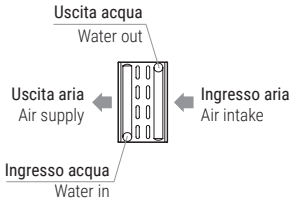

Aria ingresso: 28°C - 60% U.R. / Acqua ingresso: 7°C / Acqua uscita: 12°C Air inlet: 28°C - 60% U.R. / Water in: 7°C / Water out: 12°C									Dimensioni Dimensions

REGBTRVMC

Sistema di regolazione climatica batteria di trattamento aria posta sul canale di mandata aria a servizio di unità di recupero calore domestica costituito da:
- Sonda di rilevamento della temperatura da porre sul collarino di aspirazione dell'unità di recupero calore.
- Regolatore in ambiente per settaggio della temperatura richiesta in ambiente con ingresso per commutazione estate/inverno da dispositivo esterno.
- Valvola motorizzata proporzionale a 3 vie per controllo della batteria con contatto ausiliario per attivazione pompa.

Air treatment climatic regulation system for manage of water coil located on the air supply duct serving the domestic heat recovery unit consisting of:
- Temperature detection probe to be placed on the return spigot of the heat recovery unit.
- Room controller for setting the required room temperature with input for summer / winter switching from an external device.
- Motorized proportional 3-way valve for battery control with auxiliary contact for pump activation.

VMBT

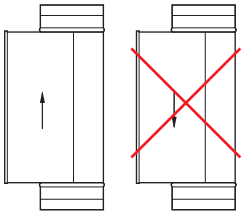

Batteria elettrica autoregolante Ø 160.
Electric battery self controlling Ø 160mm.

Modello | Model	Kw	V		A	B	C	D	€ pezzo | piece
VMBT09	0,9	230	mm	370	276	71	160	
VMBT14	1,4	230	mm	370	276	71	160	
VMBT24	2,4	230	mm	370	276	71	160	

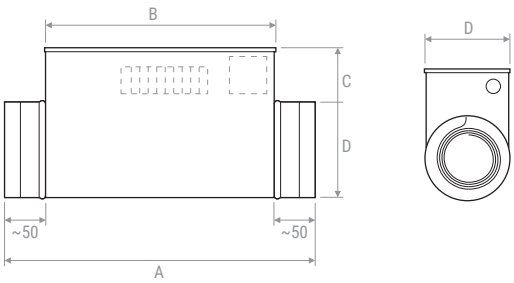

Schema di installazione valido sia per VMBT che per VMBE.
Installation scheme valid for both VMBT and VMBE.

VMBE

Batteria elettrica non autoregolante Ø 160 (possibilità gestione da PCB di unità recupero calore serie domestica).
Electric battery not self controlling Ø 160 (possibility of management by PCB domestic series heat recovery units).

Modello | Model	Kw	V		A	B	C	D	€ pezzo | piece
